When our new Athens bows arrived, the first thing Jodie and I did was install the XFACTOR dampening system. Our bows were already super smooth and quite....now, they are DEADLY QUITE! Thanks Xfactor!

I outfitted my bow with your stuff. Wow. Nice job. That thing is dead quiet. It was quiet before, but there is definitely a difference for the better with your system on. I have decided to use it the whole season. The string silencers are holding up perfectly and that's saying something with my bow. Usually they start to go in about 50 shots. I've shot a couple of hundred times and they look brand new. Beautiful. Also the bow is perfectly "dead" at the shot. No shock whatsoever. I'm even pretty sure my groups have tightened up. Either that or I have had an exceptional couple of days of shooting!

Again, thanks for the product and let me know if there is anything I can do.

Hey Todd,

Hi we had spoke at the Greensboro big buck expo we were the two younger guys that you had spoke to on sat mourning and had purchased a camo stablizer and a black stablizer from you and just wanted to email you and tell you what a impressive and effective product this is i used your stablizer then put my old one back on to see if there was a difference and i truly dont know how i shot my bow before after using your product and i will def have our outdoor store to carry some of your products hope you have great success with your products and get em out there so that more people will have the same success that i had i wish you lots of success on a great product.

Justin Hall

Todd,

It works!

I tried all of the others that I had; they did not give me the silencing that your String Factors and F6 Camo X-Factor Stabilizer did. I definitely felt less shock in the riser than I had before.

Great job!!!!

Joella

I have only started shooting a couple of months borrowing my dads 25 year old Darton bow.
I have tried Limbsavers but it felt like a lead weight on the front with no help for the hand shock.
Then Ed McPherson showed me a Xfactor 8 inch stabilizer and wow the effect was immediate!
The stabilizer improved the amount of noise and hand shock, along with shooting my first Robin Hood.
Jon

Todd,

Hello my name is James Stiltner, I am a Bowtech Pro-staff Shooter, I spoke to you yesterday about your system and you gave me a set of string silencers to try. I installed them on my Diamond Iceman, which I have been having some problems with noise and vibration on. Your silencers helped a great deal with the noise (Very Impressed) but I still have a vibration issue that I am certain that your system will cure.
Sincerely,

James Stiltner

Hey Todd,

This is the fella from columbia that spent some time over at your booth. I was at the show for Predator Trail cams. Your stuff works awesome on my bow. It took the little bit of hand shock that I had, out.
Thanks again for the silencers, LOVING THEM

Greg Pigate

Hey Todd

I would like you for talking me into trying your product at the Big Buck Classic in Omaha.
I work at a premier archery dealer in the mid-west and have shot all of the big name stabilizers in the industry, Fuse, Octane, and Limbsaver. This product sold itself when I put it on my Hoyt. "Zero" hand shock and my noise went to nothing on my bow. Todd has something great going here and everyone should have one of these on their bow. Thanks Todd for the product.

Jarred

Todd

Just bought my system today (Nebraska Big Buck Classic) installed it when I got home. I then shot my bow for awhile and didnt feel any hand shock or vibration I love it. It works very well just like described. I especially like the limb factors and the fact you can remove them and move them around. I feel this if you are looking for someone for Prostaff then look now further because every 3d event I go too and every time I stop in a proshop I'm going to be telling everyone about them. I think you have made a great product and look foward to getting a system for my wifes bow and all of my friends. Thanks again

Tim Tanner

Todd,

We met at the Nebraska Big Buck Classic. My buddy and I both bought the system. We were the ones that went over and talked to Lee about it and then came back and talked to you more. Just so ya know, my buddy and I have told many people about it.

That night we went home and put everything on our bows. We did just what you had said to try and HOLY MOLY was there a difference.

My PSE bow is set right at 70 pounds and with all of the "old stuff" on my bow there was a lot of vibration and it was pretty loud. Quite honestly, it almost felt like my bow wanted to jump right out of my hand after I squeezed the release.

I changed everything over to your product so I could "HUNT WITH THE FACTOR". My first shot after putting on the X-FACTOR..... AMAZING!!!!!!!!!! There was literally NO vibration and my bow did not feel like it wanted to jump out of my hand. I looked at my buddy that was standing by me and he just shook his head. He said that my bow was like 80% more quiet than before. I just want to THANK YOU very much for such an outstanding product!! I will be telling every bow hunter that I know about the X-FACTOR.

GOD BLESS AND GOOD HUNTING!!!

My name is Ben Allen I met you @ Iowa deer classic. My buddies and I bought your products and i said that when I used them and if I liked them i would post it on Archerytalk.com for you. Well I love the products and so do my buddies so here is a link of what i posted for you.
<http://www.archerytalk.com/vb/showthread.php?t=895099>. Hope this helps business and thanks again.

god bless
ben allen

I am from Jefferson City Mo and I recently purchased your product at the Iowa deer classic and installed all the components and they work great. The hand shock that I had before is no longer there and the bow is much quieter. The guy that I had install the string silencers at the bow shop(Archery Shack in St Martins MO) was really impressed also and he told me that he may try to contact you because no one around central MO carries this great product.

Thanks for the Great Product
Bruce Dorge

Todd,

I received your Stabilizer and limp dampeners in the mail last week. They worked great but that "twang noise was still there a little bit ". I went down to one of your dealers Bow Zone in spring Tx and purchased your String factors. I have to give it to you on this one, YOU GUYS HAVE A GREAT PRODUCT..... the sound is non existent. Thanks and have a great Christmas Holiday,God Bless..

Kevin
